Detailed Action

1. Applicants' amendments and remarks filed December 11, 2008 have been entered and considered. Claims 1 and 5-8 have been amended without introducing new subject matter and claims 2-4 have been cancelled. Claims 1 and 5-8 remain. Applicants' amendments have necessitated the new grounds of rejection set forth herein; accordingly, this action is made Final.

Response to Applicant's Remarks

2. Applicants' amendments to independent claim 1 overcomes the previously outstanding grounds of rejection under 35 U.S.C. § 103(a) as set forth in the previous Office action (mailed September 11, 2008).

Applicants' revised Abstract submitted December 11, 2008 is sufficient to overcome the previously outstanding objection thereto; accordingly, said objection is hereby withdrawn.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1 and 5-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Independent claim 1 recites the limitations of "said diaphragm under and close to said aperture thereof..." and "a major part of the stray light transmitted from said exit face is intercepted" (emphasis added). The descriptors "close to" and "a major part" as recited in independent claim 1 are relative terms, whose metes and bounds cannot reasonably be determined by the context of the surrounding claim language (i.e. how close is close? and what metrics define when a "major part" of the stray light has been intercepted by the diaphragm?).

Therefore, use of “close to” and “a major part” introduces a level of ambiguity into claim 1 that has necessitated the instant 35 U.S.C. § 112 ¶2 indefiniteness rejection. Dependent claims 5-8 fail to cure the aforementioned indefiniteness of claim 1, and so are similarly rejected.

Claims Objections

5. Claims 1 and 5-8 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record, alone or in combination, does not fairly teach or suggest the limitations of “a plane defined by said first main face defines an angle between 2° and 25° with a plane perpendicular to said exit face and intersects said diaphragm under and close to said aperture thereof” as recited in the instant independent claim.

Conclusion

6. Applicants’ amendments necessitated new grounds of rejection set forth herein; accordingly, **THIS ACTION IS MADE FINAL**. Applicants are reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however,

will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action
